or cut and paste into your browser: <http://icidvirtualcommunities.org>

Learning Objectives:

At the end of this event, participants will be able to:

1. Describe the scientific basis for different cervical cancer screening approaches utilizing cervical cytology and HPV testing alone and in combination
2. Determine the best approach to screening women of different ages based on information from the latest trials that have evaluated HPV primary screening
3. State the various approaches that will be utilized in the future to triage HPV positive women

CME accreditation pending from the Royal College of Physicians and Surgeons of Canada
